

ARALIA

Water:

Let soil barely dry on surface in between thorough soakings. Good drainage is essential. Never allow roots to stand in water. Enjoys high humidity - a gravel tray may be necessary in winter. Fertilize monthly, March through October, with an all purpose houseplant fertilizer.

Light:

Bright indirect light. Protect from direct summer sun. Will acclimate to light shade.

Repotting:

May be repotted every one to two years in spring. Use a well-draining potting soil.

If you don't see it, please ask ~ We special order.
