

CALATHEA

Water:

Keep soil evenly moist, not soggy, at all times. Always use tepid water. Reduce watering in winter. Wash leaves regularly. Fertilize monthly, March through October, with an all purpose fertilizer.

Light:

Bright indirect light. Avoid direct sun - colors fade with too much light. Move to a well lit, but sunless spot in winter.

Repotting:

Repot every two years in spring. Use a well-draining potting soil. Plant may be divided at repotting time.

If you don't see it, please ask ~ We special order.
