

EUGENIA

Water:

Always keep soil moderately moist at all times. Do not allow this plant to dry out as it will not bounce back as some of the more forgiving plants do. Keep out of drafts. Fertilize monthly, March through October, with an all purpose fertilizer.

Light:

Bright indirect light is preferred, but will tolerate filtered shade or a few hours of direct sun. Take care to protect from midday summer sun.

Repotting:

Repot, when necessary, in the spring. Use a well-draining potting soil.

If you don't see it, please ask ~ We special order.
