

Cut Christmas Tree Care

HOW TO SELECT

- * Pick the variety you desire - short needled, fragrant, ornament space friendly
- * Choose the shape and size - tall, short, conical, full
- * Check the moisture content by feeling the weight of the tree and by bending small branches to make sure they are not brittle

Now you have the perfect tree!

HOW TO CARE FOR YOUR TREE

- * Place in water within two hours of making a fresh cut on the butt of your tree. Johnson's will make a fresh cut for you at no extra charge.
- * Make a solution with a tree preservative, such as Prolong, and water to put into your tree stand reservoir.
- * Check the water level and add water as necessary, at least once a day.
- * Remember, if the tree is not absorbing several cups of water or more per day, it will dry out in a short period of time.
- * Locate your tree away from heat vents, or simply close them for the season.

TREE VARIETIES

- * Fraser fir - long-lasting, short needles, very fragrant, lots of room for ornaments, rigid branches
- * Noble fir - long-lasting, long needles, lots of gaps for ornaments, rigid limbs
- * Douglas fir - long-lasting, long needles, slightly fragrant, very full and dense
- * Balsam fir - short needles, very fragrant, lots of room for ornaments, very important to keep well watered
- * White pine - very long needles, lasts well, very dense, very soft and flexible branches
- * Colorado blue spruce - striking blue color, short, sharp needles, rigid limbs, very full and dense, lots of gaps for ornaments, important to keep well watered

** Johnson's most commonly carries Fraser fir Christmas trees at our 3 locations, as well as Noble fir in our DC location

**ENJOY YOUR TREE
AND HAVE A VERY
MERRY
CHRISTMAS!**
