

ALOCASIA

Water:

Let soil barely dry on surface in between thorough soakings; reduce watering in winter. Good drainage is essential. Wash leaves often, as spider mites can be a problem. Fertilize monthly, March through October, with an all purpose houseplant fertilizer.

Light:

Bright light in winter; semi-shade in summer.

Repotting:

Repot yearly in early spring. Divide plants at repotting time. Use a well-draining potting soil.

If you don't see it, please ask ~ We special order.
